

Laurie Laxton, RN, BSN, CCFA, RAC-CT, IP-BC, QCP

Laurie is a Bachelors prepared RN, who trained and worked in Orthopedic Trauma Surgery at UCLA for over 10 years. She is a Certified Clinical Financial Auditor with 5 years of experience auditing both acute and post-acute care settings. She is also a certified in infection prevention, the post-acute assessment instrument and quality assurance performance improvement.

Laurie is the Clinical Education Program Lead for the Provider division of Inovalon with responsibilities that include content development and delivering education training to post-acute providers in government regulations and how to read and interpret clinical data to help drive patient care and performance improvement.

Session Title: Health Care Data Analytics Process: How Providers and Patients Reacted During the Pandemic

Brief outline of session:

Learn how the pandemic has affected not only providers but patients alike. Then explore the various ways data can be analyzed to track and react for future planning based on past performance. Several real life examples will be presented so audience members can practice how to read and interpret clinical data.
